Skills & Personality

- PHP & MySQL, Ansible,
- Numerous industrial programming languages
- x86 Assembly, XSLT & XML
- Linux server (bash, etc)
- Windows domain administration
- Linux domain integration
- High reliability OEM (VMWare)
- Hardware maintenence and repair

I am a 41 year old computer expert, with over 20 years professional working experience in this field, while also engaged constant volunteer work in the same field over the years and was involved in many innovative projects.

I have worked in everything from purely technical roles, such as the main and only software developer of chemical and biological reactor control software, to working with people in DENIA workshops and educating them in the use of tools for webdevelopment. I have learned to rely on myself to get the job done, and I have learned to sometimes rely on others to get the job done faster.

It is difficult to summarize years of experience in different settings into a few bullet-points, but I have always done my work with great dedication, and problems to me were always just challenges to overcome. Whatever I get into I solve eventually, if possible with great proficiency. If the task at hand requires it, I am capable of organizing and working with a team. Meeting my clients' expectations is very important to me and I take great pride in ensuring that my work meets the highest objective quality standards.

Work Experience

Commercial

7 years, since 2019	T-2 d.o.o. - DevOps, developing software for server/cluster setup - Management of Linux-based infrastructure - Educating coworkers - Level 3 support for hosting and infrastructure equipment
2 years, since 2016	Igor Srdoč s.p. - Technical expert working on contracts, primarily IT support and systems integration
7 years, since 2011	BIA Separations d.o.o. - IT department head - Oversight of external contractors - Operation of all company security equipment - Design and development of applications to streamline multiple business processes - Help in eliminating bottlenecks in business processes
8 years, since 2003	BIA d.o.o. - Repairs for company and client equipment - IT support - Software developer for client laboratory equipment automation - Software developer for company experimental prototypes

Non-profit

17 years, since 2009	Društvo za trajnostni razvoj Duh časa - Senior engineer involved in majority of repairs by the group during a period - Work-process optimization advisor - Co-author of EU project documentation
4 years, since 2010	DENIA - Development of European Non-Profit Internet Activity - Lecturer - Developer, working on commercial websites - Developer, contributing to open-source projects
1 year, in 2010	Očistimo slovenijo v enem dnevu - Member of the technical support crew for email system and website - Personal technical support and computer repairs for the core team of organizers
4 years, since 2008	Earth Organisation for Sustainability - Author of multiple articles attributed to the organization - Community manager

Experience with computers / programming

2019	Started at T-2 d.o.o. A significantly more tech-oriented and innovative company, with multiple datacenters and mostly open-source software.
2016	Transferred to Igor Srdoč s.p. Access to interdisciplinary team that specializes in computers, focusing my creative effort on this field
2011	Transfered to BIA Separations d.o.o. as IT department head Gained buisness process experience, helping them automate by creating functional intranet applications
2010	Established web-development organisation DENIA with Igor Srdoč Held lectures in website authoring for numerous startup founders who still remember us.
2008	Also a web-developer on the side Worked with professional designers to write websites for companies like Biobanka d.o.o. and 12postaja
2003	Employed at BIA d.o.o. as an independent developer Programming of research biological and chemical reactor - control software, for the Biotechnical faculty, Krka and Lek
2002	International programming collaboration: ICI-ICSA; team of 3 A proof of concept peer-to-peer distributed execution system with high encryption; authored everything except encryption
2000	Worked with Ryan Morris Programming team called MesonAI
1996	Mastery of programming language: QuickBASIC Learned utilization of all the commands in the language
1993	First programming language: Sinclair BASIC Dazzling programming with computer graphics
1990	First computer: HP 9825A Learned to type before learning how to write

Formal Education

2000	Technical gymnasium Srednja Agroživilska šola, Ljubljana, Slovenia Emphasis on Microbiology and Biotechnology, which I obtained a job in, during my education Degree acquired in 2004

Languages

- Slovenian - fluent conversation & active
- English - fluent conversation & active
